

## Affordability & Cost Savings

With VUC's SIP Trunking, you can seamlessly and affordably transition to a cloud-based voice service without having to replace your existing legacy PBX. This enables you to retain your investment in digital phones while realizing the cost benefits of consolidating your voice and data services.

## Business Continuity

Your company requires business continuity planning to ensure that customer calls do not go unanswered.

## Multi-Site Support

Whether your company has two or two thousand locations, VUC's SIP Trunking can enhance the capabilities of your PBX.

Delivered from the Cloud, Velocity Unified Communications Hosted Services is the best choice For Business Continuity.

- Free, expert migration and onboarding
- Superior 24/7 phone and email support
- 99.999% uptime guarantee
- Preserve capital: no hardware to deploy

Imagine being able to access your desktop  
From any device you want, any app you want

- True BYOD
- End User Productivity
- Agility
- Lower Costs
- Security
- Ride the Consumerization of IT
- Control

When Microsoft Windows 3.1 came out, it turned a text based interface into a graphical user interface, making the PC personal. When Blackberries came out, they made it easier to respond to emails from anywhere. Now, hosted virtual desktops (HVD) are the evolution in the workplace. The entire digital workplace follows employees making productivity enhancements unlike previous technologies. With dinHVD Enterprise, you can take advantage of built in managed services such as help desk, monitoring services and more.

Imagine being able to Add Servers  
As many as you want, as quickly as you want

- Security
- Control
- Performance
- Flexibility

Velocity Communications can assist customers with deployment of software or applications through our Professional Services network. We provide TCO and ROI analyses of moving to a hosted virtual server provider. Contact our cloud specialist for details regarding monthly and annual subscriptions. Velocity Communications provides a guaranteed 99.9% up-time.

The future is amazing, and Velocity Communications will help you transition into it.
